CONNECTORS

EMS uses Fischer Core Series for its Swiss DolorClasT®

Connect² Reliability

Fischer Connectors is an ISO 13485 certified company that has been designing, manufacturing and distributing high performance push-pull connectors and cable assembly solutions for almost 60 years. Proven to be reliable on very demanding environments, Fischer Connectors' products are ideal for medical equipment.

Connect² Innovation

It's not just about innovative products, it's about empowering you to design stronger, smaller, lighter, or more durable solutions for your customers.

Fischer Core Series & UltiMate™ Series

- Standard solutions or customized product development
- Sealed (up to IP68) / hermetic
- Lightweight and compact connectors

Fischer Plastic Series

- Plastic housing providing a high degree of electrical insulation and shock-protection
- Sterilizable up to thousands of cycles
- Color coding system for easy identification

Fischer MiniMax™ Series - When less is more!

- Miniaturization; less than 7mm inside the box
- High density; 24 pins in 12mm diameter
- Unique combination of 20 signal + 4 power pins

Fischer FiberOptic Series - Robust Optical Performance

- IP68 mated, IP67 unmated, shock & vibration resistant
- Easy cleaning
- Fast mating

Connect² Expertise

We connect not only with clients who build devices, but with the people – the doctors, nurses and operators – who use them on a daily basis and need proven reliable connectors when a life is on the line.

Fischer Connectors created a unique solution for the Maquet CARDIOHELP

Dental-Moving has chosen Fischer Connectors for the development of the Easy.Macro.View
