

DX4 Series w/ Guard Plate Micro USB Connector

Connector Training Module

Application Examples

- Tablets
- Laptops
- Other devices with Micro USB

DX4 Series Line-up

DX4 Series Features

Slim and Compact

- Compatible with the Micro-USB 2.0 standard for small devices standardized by the USB Implementers Forum, Inc.
- Gold (Au) over Palladium Nickel alloy (Pd Ni) over Nickel plating promotes mating cycle durability and long product life.
- Superior rigidity with high-strength stainless steel shell.
- Available in a variety of versions to suit various device configurations.
- Two-shell structure to prevent contact failure due to flux scattering during the reflow process.
- Select versions have guard plates designed in the mating area to prevent damage from misaligned mating.
- RoHS compliant.

DX4 Series Features

Guard Plate

JAE offers connectors with guard plates which are incorporated in the mating area to prevent damage from misaligned mating.

DX4 Series Mid-Mount Type Feature

Two-Shell Structure

Benefits of the two-shell structure include:

- Preventing the shell from opening when twisted
- Enhanced reliability due to minimal open areas
- Enhanced durability against over insertion of plug

Press-fit area: 4 points

Bending swage: 4 points

Punched swage: 2 points

DX4 Series Mid-Mount Type Feature

Prevents flux scattering

JAE's two-shell structure on the DX4 mid-mount type connector prevents flux from entering into the connector mating area.

Openings on mounting side of shell:

- Friction lock area
- Attachment point of two shells

No open areas on bottom side of the shell.

DX4 Series On-board Type Feature

Secure Through-Hole Structure

Product Example
DX4R005JJ2

The on-board through-hole type is durable against impact when plug is inserted.

General Specifications

No. of Contacts	5 positions
Contact resistance	30m Ω max (initial)
Insulation Resistance	1000m Ω max (initial)
Dielectric Withstanding Voltage	AC 500 Vr.m.s (for 1 minute)
Operating Temperature Range	-30 to +80 ° C
Rated Current	1.8 A (Vbus, GND) Others DC 0.5A
Rated Voltage	AC 30 Vr.m.s
Mating Durability	10,000 cycles

Material and Finishes

Component	Material and Finish
Insulator	Synthetic Resin
Contact	Copper Alloy/ Contact area: Au over Pd Ni alloy plating Terminal area: Au flash plating over Ni
Shell	Stainless Steel / Sn plating over Ni

Summary

- The DX4 Series line-up includes a variety of versions to suit different device configurations.
- The DX4 series Micro USB connector is the narrowest connector, with a width of 1.95 mm.
- Guard plates are incorporated into the mating area to prevent damage.
- The DX4 Series' high-strength stainless steel shell is resistant to twisting.

Technology to Inspire Innovation
